Dear Valued Patient,

I would like to take this opportunity to thank you for your continued trust and confidence in permitting me to care for you and provide for your dental needs over these past years. Some of you have been loyal patients of mine since I opened at this location over 27 years ago. It has been both a privilege and pleasure to be your neighborhood dentist and a part of the community. For these reasons, it is with mixed emotions that I am informing you of my retirement from my practice.

This has not been an easy decision. I have loved being your dentist, but I have decided to accept a teaching position and look forward to the challenges in this new career.

To ensure that you will continue to receive the best possible dental care, I have over the past months evaluated a number of candidates who had expressed an interest in assuming my practice. I have selected Dr. Christina Kim, a caring and talented dentist with excellent credentials and skills in all areas of my practice, including pediatric, restorative, cosmetic and implant dentistry. She also possesses expertise in additional areas of dentistry, including endodontics and oral surgery. In addition, she plans to upgrade the office with digital x-ray and computer equipment and other modern dental technologies to provide a state of the art dental facility for years to come. The practice will now be known as East Falls Family Dentistry, LLC.

Dr. Kim is a graduate of the University of Washington in Seattle with a degree in Biochemistry. She received her Doctorate of Dental Medicine from the Temple University School of Dentistry. She is a member of the American and Pennsylvania Dental Associations. She and her husband Jason have a daughter, Lillian, and reside in King of Prussia.

I intend to make myself available to Dr. Kim to assist with any transition issues that may arise, but I am quite confident that you will be very satisfied with Dr. Kim and the care that she delivers.

With warmest regards,

Lee B. Durst D.M.D.
